

Steam-Bent Art Deco Bookshelf

Steam-Bent Art Deco Bookshelf is built from red oak with a natural finish. Approximately 34 inches wide by 11 inches high by 6 inches deep. This shelf mounts on wall and can hold up to fifteen pounds.

These shelves form two sides of an isosceles triangle. Triangles are considered to be the strongest straight-edge geometric shape. When mounted on a wall a rigid triangle is created and the flexibility disappears.

For a dramatic effect, several shelves can be mounted on the same wall.

Width Against Wall is 34" Height is 11" Depth is 6"
